STEPHEN BASSETT

The Post-Disclosure World

It is inevitable and likely soon the human story will include global confirmation and acceptance of a technologically advanced non-human presence on the Earth from somewhere. That confirmation will mark the beginning of the post-Disclosure era and cannot come too soon. At the turn of the 20th Century human world population was 1.6 billion. It took 300,000 years to achieve that number. As 1.6 billion became 8.3 billion, there was more advancement in science and technology than in the previous 12,000 years. Unfortunately, that advancement contributed to the most violent and destructive century pushing civilization to the brink and the planet's capacity to sustain 8.6 billion beyond the brink. Our current existential predicament is not coincidentally linked to the manifesting, non-human presence. We are out of time for a reset and transition to the post-Disclosure era is the only option we have. Stephen Bassett is a political activist, Disclosure advocate and the executive director of Paradigm Research Group (PRG) founded in 1996 to end a government-imposed embargo on the truth behind extraterrestrial related phenomena. He has spoken to audiences around the world about the implications of "Disclosure" - the formal confirmation by heads of state of an extraterrestrial presence engaging the human race.

It is inevitable and likely soon the human story will include global confirmation and acceptance of a technologically advanced non-human presence on the Earth from somewhere. That confirmation will mark the beginning of the post-Disclosure era and cannot come too soon. At the turn of the 20th Century human world population was 1.6 billion. It took 300,000 years to achieve that number. As 1.6 billion became 8.3 billion, there was more advancement in science and technology than in the previous 12,000 years. Unfortunately, that advancement contributed to the most violent and destructive century pushing civilization to the brink and the planet's capacity to sustain 8.6 billion beyond the brink. Our current existential predicament is not coincidentally linked to the manifesting, non-human presence. We are out of time for a reset and transition to the post-Disclosure era is the only option we have. Stephen Bassett is a political activist, Disclosure advocate and the executive director of Paradigm Research Group (PRG) founded in 1996 to end a government-imposed embargo on the truth behind extraterrestrial related phenomena. He has spoken to audiences around the world about the implications of "Disclosure" - the formal confirmation by heads of state of an extraterrestrial presence engaging the human race.
