DR. ROBERT YOUNG
Regaining Your Inner Terrain

Introducing alkalizing, nutrient-dense, electron-rich foods and greater amounts of water, can correct imbalances and restore optimal health and wellness. The Young's research documents the power of natural, plant and mineral-based nutrients, when optimally combined, and each "energized" to reflect its origin from the sun. A nutritional program for maintaining a healthy acid-alkaline balance requires the intake of superior nutrients provided by eating organic grasses, vegetables, herbs, and minerals. Alkalizing foods such as green leafy vegetables, cucumbers, sprouts, radishes, avocados, lemons, etc. provide more electrically charged, tiny particles of 'captured sunlight'. Such foods more closely match the energetic level of our body's cells. By bathing the cells in alkalizing nutrients you illuminate and energize the whole body and regain you Inner Terrain. Dr. Robert O. Young, PhD, a microbiologist and biochemist, has been widely recognized as one of the top research scientists in the world.
